

BP and Texas City teams up with HLS

BP and the City of Texas City teamed up and on June 24, 2009 planted over 4000 plants at the entrance of Texas City off the Gulf Freeway. HLS was the contractor that prepared the area for the volunteers which included but was not limited to the installation of irrigation, a monument and lighting. The project was a huge success thanks to years of experience and expertise of John Cummings the Director of Landscape Construction. The story was covered by Channel 2 news. We know the residents of Texas City and visitors passing through will enjoy the beautification of this strip of highway for years to come.
