

HLS Maintains the Beauty of Stafford Texas

In case you haven't noticed Stafford has installed 116,000 square feet of beds along the North and South side of US 90 A. Thousands of shrubs, trees and flowers have been planted by HLS Enterprises under the watchful eye of Field Supervisor Rene Escobar. Irrigation was also installed to insure the well being of the landscaping. The plant material will continue to provide all who travel this stretch of highway a pleasant view of native plant material that will grow and thrive.
